The Amrita E-Learning Research Lab, a unit of the Amrita University, has won the award for educational excellence in the field of educational technology at the Indo-Global Educational Summit and Expo-2012 held at Hyderabad last Sunday.

The summit organised by the Indus Foundation Inc, US, was supported by the Union Ministry of Human Resource Developmen. Representatives of educational institutions from over 40 countries attended it.

The award was in recognition of the Amrita University's effort in developing A-VIEW, an e-learning platform aimed at addressing the challenges of shortage of experienced teachers.
